## Job Overview:

The Farm Production Manager is responsible for custom onion growing; crop scheduling, variety trialing, crop reporting, crop harvest management, crop quality, crop planting reporting, inspection of crop, yield and cost analysis. Field operations include land relationships, planting management, irrigation management, chemical management, ground work scheduling, and harvest production scheduling, communication on sizing/quality with sales/packing shed along with all other aspects of crop production.

## Responsibilities & Duties:

- Keep and analyze production data in Excel, estimating days to harvest, crop schedules, planting and harvest plans.
- Learn the quality criteria of all crops grown.
- Learn the various varieties and relate to seasonal use for best crop quality.
- Write summaries of crop quality, total yield and yield per acre for distribution in company.
- Become fluent in crop production practices, tractor, irrigation, pest control, and fertility programs to discuss knowledgably with suppliers and company personnel.
- Confirm planted acres, wet dates and locations for actual plantings.
- Learn to forecast crop maturity and yields.
- Learn the harvest techniques for onion crops.

## Requirements:

- College Degree in Ag Business, Agronomy, Ag Science or related field.
- 1-3 years in vegetable or crop production helpful, PCA experience or industry related experience.
- Excellent written and verbal communication skills.
- Computer literacy – strong excel skills.
- Bilingual English/Spanish required

- Must be able to work in a team environment and maintain confidentiality.
- Must have good driving record.
- Must be able to lift and/or carry 45 lbs.
- Must be able to walk in uneven terrain.
- Must be able to work outdoors in inclement weather.
